RACEWOOD
EQUESTRIAN SIMULATORS

The RT Jockey CHALLENGE

This is an engaging plug-and-play game featuring multiple mechanical horses that race on a large, shared screen at the front. The 'jockeys' compete by pressing on the necks of their horses to accelerate and claim victory. It is **not** focused on training or technique like other Racewood simulators; it presents a challenge of strength and endurance and has been modified for the general public, rather than professional jockeys.

PRICING

1 x RT Unit (1 x horse racing against clock) **£14,800**

2 x RT units (2 x competing against each other) **£23,200**

3 x RT Units (3 x competing against each other) **£31,600**
