

RT

Standard features

The Racetrainer, or 'RT', is a non-motorised simulator. The RT is able to be folded down to make it more easily transportable than the RS and is available both in an interactive and non interactive version. The RT works all of the essential muscles needed by the jockey to win a race; as such, it is a vital piece of kit for both aspiring as well as professional jockeys.

Simulator riding weight - 100kg.
Simulator weight - 40kg.
